LANGUAGES & FRAMEWORKS

- JavaScript / TypeScript
- React / Next.js
- React Native
- Node.js / Express.js
- Nest.js
- PHP / Laravel
- Dart / Flutter

FRONTEND & STATE

- Redux, Zustand, Context API
- React Query
- React Router
- Responsive & cross-platform UI

BACKEND & API

- RESTful APIs
- GraphQL
- WebSockets / Socket.IO
- Bull.js (Job Queue)
- JWT / OAuth (Google, GitHub)

DATABASES

- MongoDB, Mongoose
- MySQL
- Redis
- Firebase Firestore

DEVOPS & TOOLS

- Git, GitHub/GitLab/Bitbucket
- Docker / Docker Compose
- CI/CD (GitHub Actions, GitLab CI)
- NGINX, PM2, Nodemon
- Postman, Swagger
- FFmpeg

PROFILE

Results-driven Fullstack Developer with over **6 years** of hands-on experience building scalable web and mobile applications end-to-end. On the frontend, I craft responsive interfaces with **React, Next.js, and React Native**, backed by clean state management (**Redux, Zustand, React Query**). On the backend, I design **RESTful and GraphQL APIs**, real-time features with **WebSockets**, and services using **Node.js, Express.js, and Nest.js**, backed by **MongoDB, MySQL, and Redis**. I've also built media-streaming infrastructure (RTMP/HLS via **NGINX and FFmpeg**), integrated **Web3.js** for Ethereum smart-contract interactions, and shipped everything through **Docker** and CI/CD pipelines. Comfortable owning a feature from database schema to pixel-perfect UI, with a focus on clean architecture and performance.

WORK EXPERIENCE

Khan Global Studies

Fullstack Developer

- **Technical Leadership:** Led end-to-end development of a full-stack application using **React, Next.js, and Nest.js**, optimizing architecture for scalability and performance through efficient state management and server-side rendering (SSR).
- **Streaming Infrastructure:** Configured an **RTMP server** with **NGINX** and **FFmpeg** to receive incoming **HLS video streams** and transcode them into multiple quality levels, enabling adaptive bitrate streaming across varied network conditions.
- **Real-time Features:** Enabled real-time communication within the app using **WebSockets**, providing live updates and dynamic interaction on the frontend.
- **Client-side Architecture:** Implemented efficient navigation with **React Router**, and managed data fetching, caching, and synchronization using **React Query** for a smooth, responsive UX.
- **Project Management:** Managed sprint planning and stakeholder alignment, ensuring timely delivery of well-tested features while maintaining strong code coverage and system reliability.

Civildaily

Mobile Developer

- Developed a high-performance mobile application using **React Native**, delivering a smooth, consistent user experience across **iOS** and **Android**.
- Integrated **WebView** to seamlessly render external web content within the app, enhancing in-app versatility and user engagement.
- Implemented scalable state management using **Redux**, ensuring efficient data flow and maintainable code architecture.

Dpad Finance

Fullstack Developer

- Integrated **Web3.js** to enable secure interaction with the **Ethereum blockchain**, allowing seamless execution of **smart contract** functionality directly within the application.
- Utilized **EJS templates** to render dynamic server-side HTML, ensuring fast load times and an **SEO-optimized** user experience.

Munchin

React Native Developer

- Developed a robust cross-platform mobile application using **React Native**,

delivering a unified, responsive experience across **iOS** and **Android**.

- Implemented **Google OAuth**-based login, enabling secure, fast, and user-friendly authentication with reduced onboarding friction.
- Integrated **RESTful APIs** using **Axios** for efficient data communication between frontend and backend, ensuring real-time updates and a smooth UX.

PROJECTS

Khan Global Studies — KGS Dashboard, KGS Mobile App, KGS Store

Civildaily IAS

Habitat, Studio, Quizkr

EDUCATION

Graduation — L.N.M University

Web Development — Code with Mosh

DevOps — KodeKloud
